

# Indhold

---

- Do we have description for minimal viable produkt

## Arkitetur

- Arkitetur
- Systembeskrivelse
- Systems Domain Analysis ( Systemdomæneanalyse)
- System Analysis
- Domain Analysis (domænemodellen) and Concept class
- Choice of arkitektur
  - Server and Client
  - Model-View-Controller
  - Other things
- Api Specificationer
- Protokol description
  - HTTP protocol
  - REST/CRUD protocol
    - URI and URL
    - TCP/IP protocol
  - Encryption Protocol
- Deployment View

## Design

- What is the design
- Domain model with types or E-/R diagram
- Frontend
  - Design pattern
    - Interceptor pattern
    - Query pattern
  - Class diagram
- Backend
  - Design pattern
    - Middleware pattern
  - Principal
    - Code-First Approach
    - Migration
  - Class diagram
  - Describes Swagger
  - API Swagger site / Metode description
- Database

## Implementation and Test

- How do we implement
  - Frontend
    - Implementation describe: metodenname and descibtion
    - Implementation show UI photos
  - Backend
    - Implementation describe: metodenname and descibtion
- What do we test
  - Frontend
    - Descibe unittest
    - Unittest - with validation
  - Backend
    - Descibe unittest
    - Unittest - with validation
- Integrationstest
  - Server and database
    - Postman - with validation
- Systemtest
  - Client and server with database

## Accepttest

- Why and how
- Gherkin from Accepttestspecification
